PROFESSIONAL SUMMARY

Detail-oriented Data Analyst specializing in transforming complex datasets into actionable visual insights. Proficient in Python, Tableau, and Advanced Excel/Google Sheets to build automated data pipelines and interactive dashboards. Experienced in applying statistical analysis to solve real-world problems in healthcare and education, helping organizations optimize operations and make data-driven decisions.

EDUCATION

Bachelor of Technology (Artificial intelligence)
Newton School of Technology, Rishihood University

2024 - 2028
Grade: 7.302/10.0

PROJECTS

Healthcare Data Analytics ([Demo](#))

April 2026

- **Processed Data:** Cleaned and organized 76,000+ hospital laboratory records using **Python (Pandas)** to prepare the data for analysis.
- **Built Dashboards:** Created an interactive **Tableau** dashboard to visualize patient health trends and track abnormal test results.
- **Found Key Insights:** Analyzed the data to discover that emergency room admissions lead to 36% longer hospital stays compared to planned admissions.
- **Improved Patient Care:** Used data clustering techniques to identify a small, high-risk group of patients who needed immediate medical attention.

Analyzing Institutional Concentration in Indian Higher Education ([Demo](#))

February 2026

- **Processed Data:** Cleaned and analyzed a large dataset of 47,000+ college records using **Python** to study the growth of education in India.
- **Built Dashboards:** Created interactive **Google Sheets** dashboards using Pivot Tables and charts to visually map college locations across different states.
- **Found Key Insights:** Discovered that private colleges dominate the education sector (making up 62.7% of all colleges) and are heavily concentrated in just a few specific states.
- **Recommended Actions:** Provided clear suggestions to help the government optimize its budget and build public colleges in underserved rural areas.

CERTIFICATIONS

Google Developers Certificate Google

February 2025

This certificate was given as part of a workshop conducted by Google Developers Group

SKILLS

Computer Languages: Python, SQL

Data Tools: TensorFlow, NumPy, Power BI

Software Packages: Pandas, MySQL, Excel, Scikit-learn, PyTorch, OpenCV, SciPy

Others: Matplotlib, seaborn, Spreadsheet, Analytics, Tableau
